Travel Guidance Correction

Please see the correction to the email that was sent yesterday per [CDC guidance](#) below:

*Unvaccinated individuals who do travel should get tested 1-3 days before their trip and 3-5 days after travel. Even if they test negative, the CDC recommends unvaccinated individuals stay home and self-quarantine for **7 days** after domestic travel, and for **10 days** if they are unable to test.*

Thank you in advance for letting your children's teachers and/or principal know that you will be traveling and your return date so we can prepare for virtual learning.

REMINDER: Travel Guidance

We hope that everyone has a chance to enjoy the December break which is right around the corner. We wish you happy and joyous times with family and friends while you gather and make lasting memories and possibly travel. Just as we did during the Thanksgiving holiday, **for those children who are not vaccinated**, we want to remind you to provide your children's teachers/principals your travel plans a week in advance which will assist us in preparing virtual learning upon your return.

Please note that if your children are unvaccinated, they will automatically be set up with virtual learning due to their need to quarantine. We ask that you **provide your return date** so we can calculate the 14-day quarantine period. (This time period increased from 10 days to 14 days because we are in a higher risk category). Additionally, there is no need to quarantine if your children are vaccinated.

Safe and healthy travels,
Dr. Jonathan Ponds
